FP Mattioli Woods Property Securities Fund, a sub-fund of FP Mattioli Woods Funds ICVC

Class M Income Shares (GBP) (ISIN GB00BMCH5W91)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The Fund will look to provide investors with a growing income (where money paid out (in terms of actual amounts (£) paid out per unit held) from the Fund increases on annualised basis) and some capital growth (the increase in value of the Fund) over a market cycle (a 7 year rolling period). Growing income will be the primary objective of the Fund and capital growth the secondary objective.

Policy:

The Fund seeks to achieve its objective by investing a minimum of 75% in a diversified portfolio of real estate securities, comprising real estate investment trusts (REITs) and real estate operating companies (REOCs) which provide exposure to a broad range of sectors of the property market, including: industrial, offices, retail, healthcare, residential, student, logistics, storage and leisure.

The Fund may also invest in:

- bonds (loans, usually to a company or a government that pays interest),
- collective investment schemes,
- other transferable securities,
- money market instruments (investments usually issued by banks or governments that are a short term loan to the issuer by the buyer. The buyer receives interest and the return of the original amount at the end of a certain period),
- deposits,
- cash and near cash

Other than cash and money market instruments all investments will have a clear connection with property.

The Fund will not invest more than 25% in any single collective investment scheme. The Fund can invest in other funds managed by the ACD or its associates.

- The Fund is actively managed.

Benchmark:

The Fund does not have a specific benchmark. Investors can assess the performance of the Fund by considering whether it has achieved the investment objective of providing a growing income and some capital growth over a market cycle of a 7 year rolling period.

Other information:

- You can buy and sell shares on most business days where the London Stock Exchange is open for a full range of services.
- The Fund's base currency is Pounds Sterling.
- We carry out investors' requests, to buy, sell or switch, at midday on each business day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next business day.
- The Fund is suitable for investors seeking exposure to the property asset class benefiting from both income and growth but through exposure to liquid investment vehicles.
- Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within seven years.
- There can be no guarantee that the objective of the Fund will be achieved.
- On encashment, particularly in the short-term, you may receive less than the original amount invested.
- If you hold income shares, income from investments in the Fund will be paid out to you four times per year.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
 - The risk category shown is not guaranteed to remain unchanged and may shift over time.
 - The lowest category does not mean 'risk free'.
 - The Class M Shares above appear as a '6' on the scale. This is partly because the Fund invests in the shares of companies, whose values tend to vary more widely.
 - The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.
- In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:
- Counterparty Risk - The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.
 - Liquidity Risk - Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.
 - Management Risk - Investment management techniques that have worked in normal market conditions could prove ineffective or detrimental at other times.
 - Exchange Rate Risk - Fluctuations in exchange rates may cause the value of your investment to rise or fall.
 - Investing in other collective investment schemes - As an investor of another collective investment scheme, the Fund will bear, along with the other investors, its portion of the expenses of the other collective investment scheme, including management, performance and/or other fees. These fees will be in addition to the management fees and other expenses which a Fund bears directly with its own operations.

- Non-UCITS Retail Schemes (NURS) - The Fund is classed as a NURS and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.
 - Real estate and related investments can be negatively impacted by any factor that makes an area or individual property less valuable. Specifically, investments in real estate holdings or related businesses or securities (including interests in mortgages) can be negatively impacted by natural disasters, economic declines, overbuilding, zoning changes, tax increases, population or lifestyle trends, environmental contamination, defaults on mortgages, failures of management, and other factors that may affect the market value or cash flow of the Investment. Many issuers of real estate-related securities are highly leveraged, which can make their securities more volatile. The value of real estate-related securities does not necessarily track the value of the underlying assets.
 - Overseas bonds and currencies - From time to time, the Fund may invest in overseas bonds and currencies. These markets may respond to different influences to those that affect the underlying fund's and accordingly carry a higher degree of risk.
 - Fixed Income / Fixed Interest - Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates increase, capital values may fall and vice versa. Inflation will erode the real value of capital.
 - Market Fluctuations - The investments of the Fund are subject to normal market fluctuations and other risk inherent in investing in securities. Appreciation in the value of investments is not guaranteed.
 - Interest Rate Risk - Interest rate movements affect the value of bonds. Bonds with a longer maturity period are more sensitive to changes in interest rates.
