

BNP PARIBAS

UK And Japan Defensive Growth Plan

September 2023 Factsheet

This is a marketing factsheet for professionally advised investors. The factsheet is not investment advice from either IDAD or the issuer, and must not be construed as such by advisers or investors. Capital is at risk and subject to Issuer risk.

IDAD Limited is Authorised and Regulated by the Financial Conduct Authority FCA FRN 740499. IDAD Africa (Pty) Ltd is an Authorised Financial Services Provider with FSP no: 50937. No part of this publication may be reproduced, copied or distributed without the prior permission in writing of IDAD. All investors should seek advice from a suitably authorised financial adviser and investment must be made via an authorised counterparty.

BNP PARIBAS

UK AND JAPAN DEFENSIVE GROWTH PLAN

SEPTEMBER 2023 FACTSHEET

TARGET RETURN: **GBP = 11.25% p.a.**

INVESTMENT DESCRIPTION

A 7 year investment product linked to the performance of the FTSE 100 and TOPIX Indices. Initial Levels are the close of business level of the Underlyings on the product Strike Date.

If on any Annual observation date (including the Final Observation date), starting at 24 months, both of the Underlyings are at or above the relevant Autocall Trigger, the investment will autocall. Initial capital plus the Coupon Rate for each annual period which has elapsed is paid and the investment will end.

At the Final Observation date, if both Underlyings are at or above 65% of their Initial Levels, then full capital is returned. If any Underlying is below 65% of its Initial Level at maturity, capital return will be reduced on a 1-for-1 basis. For example if the worst performing Underlying has fallen to 40% of its Initial Level, 40% of the capital will be returned.

BENEFITS

- Autocall feature potentially shortens the investment term and can still be triggered in falling markets.
- Snowballing Coupon.
- Early maturity provides an opportunity to re-assess client's wealth strategy.
- Daily secondary market pricing under normal market conditions.

RISKS

- The return is limited to the pre-defined investment terms.
- The Coupon payment is conditional upon the performance of the Underlyings.
- There is a risk to capital should any Underlying breach the capital protection barrier on its Final Observation date.
- Investors will be exposed to the credit risk of the Issuer. If the Issuer becomes insolvent or cannot make the payments on the product for any other reason, investors could lose some or all of their investment. A decline in the Issuer's credit quality is likely to reduce the market value of the product and therefore the price an investor may receive for the product if they were to sell them in the market.
- Should investors need to sell their investment before maturity, the trading price will likely mean they get back less than they invested.

IDAD was established in 2002 and our approach from the outset, is what we call the "IDAD Difference". The selection of the investments we offer is not decided in terms of profitability alone and when developing investment products, we favour evidence over dogma. We are happy to work with advisers and product providers alike to deliver a range of investment options to suit differing client wealth strategies. We're proud of our approach to business as well as the investments delivered as a result of the "IDAD Difference". We are committed to building upon our reputation for bringing benefits to all involved in the investment process, but most importantly to the clients.

TARGET RETURN: GBP = 11.25% p.a.

RATIONALE

Structured products are becoming increasingly popular for investors due to the wide variety of payoffs and levels of protection that can be achieved by the different types of structures that are available.

Autocalls have been one of the most popular structures over the years. With a classic autocall, returns are paid if all Underlyings are at or above the Autocall Trigger on an observation date.

The Underlyings have been selected in order to support the anticipated delivery of that growth.

The autocall payoff can bring an early return of capital allowing the opportunity for a re-assessment of investment strategy. The value of this feature cannot be underestimated as it brings with it the opportunity to secure capital value, as well as the chance to take advantage of future market trends.

To manage the capital risk, a final level barrier set at 65% means any Underlying must fall by more than 35% on the Final Observation Date before capital is at risk.

SUITABILITY

This product may be suitable for investors who:

- Are seeking the opportunity for higher returns than current cash rates at the time this product was launched.
- Are seeking growth rather than Income.
- Understand and accept there is a risk to capital and how the Capital Protection Barrier works.
- Understand the impact of global economic issues and how they will affect the product.
- Understand the criteria which will determine the growth payments.
- Are looking to invest for the long term, being happy to remain invested until maturity.
- Can afford to have their cash invested for the full term of the product.
- Wish to use this investment as part of a well-diversified portfolio.
- Understand that the returns are pre-defined and that they will forgo growth in the Underlyings which exceeds the fixed level of growth available with this investment product.
- Understand the risk to capital in the event of an Issuer default.
- Accept that the trading price will likely mean they get back less than they invested, should they need to sell their investment.
- Understand that any return is conditional upon the parameters being met for the plan to autocall.

HOW TO INVEST

This product can be traded using Pershing, your chosen custodian that has permissions to trade and settle the product on your behalf. These can range from Pension Providers, Private Banks and Trading Platforms. This should be discussed with your adviser.

Please note that your cash will be in your account with Pershing until the issue date. Settlement then takes place delivery versus payment where the cash will leave your custody account and you will receive your investment holding into your custody account.

FEES AND CHARGES

IDAD will receive a fee from the Issuer for arranging this product. The charge has been fully accounted for in the calculation of the product's structure and is not expected to exceed 1.0%. Therefore this means that an investment of £10,000 will generate growth based on £10,000. There may be separate fees charged by your Financial Adviser and your chosen market Issuer. You should discuss this further with them.

THE UNDERLYINGS

The **FTSE 100 Index** is a capitalization-weighted index of the 100 most highly capitalized companies traded on the London Stock Exchange. The equities use an investibility weighting in the index calculation. The index was developed with a base level of 1000 as of December 30, 1983. * Please see UKEDA100 Index and FTPTP100 Index for the official FTSE 100 Index Dividend Yield and P/E Ratio*

The **TOPIX**, also known as the Tokyo Stock Price Index, is a capitalization-weighted index of all companies listed on the First Section of the Tokyo Stock Exchange. The index is supplemented by the subindices of the 33 industry sectors. The index calculation excludes temporary issues and preferred stocks, and has a base value of 100 as of January 4, 1968.

BNP PARIBAS UK AND JAPAN DEFENSIVE GROWTH PLAN

SEPTEMBER 2023 FACTSHEET

TARGET RETURN: GBP = 11.25% p.a.

RISKS

All investments carry risk. Prior to investing in one of our structured products you need to make sure you fully understand the risks you are taking and accept the level of risk offered by the plan.

Having read over the product factsheet and these risks, if there are any areas that you are still unsure about, please consult with your financial adviser who will be able to help you.

Issuer Risk

Your money is being used as a form of loan via the issuing bank in exchange for the returns offered by structured product. The bank is legally committed to honour the terms of the plan. It is possible that the Counterparty may go bankrupt or default on their payment.

Market Risk

Underlying Index performance may be volatile and subject to unpredictable changes over the investment term. The value of your investment is affected by movements in the price of these indices and a fall may result in you not receiving any returns, and/or the loss of some or all of your capital. Your investment does not directly invest in the Underlying indices therefore you are not eligible for dividends or voting rights.

Early Redemption Risk

You should be prepared to hold any plan until maturity. It may be possible for you to sell this investment back to the Issuer early; however, they are not obliged to buy it and may stop such purchases at any time without notice. IDAD has no control over this: we act as your settlement agent. If you sell the investment early you may not get back what you initially invested.

Market Disruption Events

It is possible that a market disruption event might occur, such as trading disruption, changes to the indices, changes to index providers or changes in tax legislation. In these circumstances, the Issuer has the right to determine whether any adjustments to the terms of a plan are required. These adjustments may include, but are not limited to: adjustments to the opening or final level of the indices, postponing observation dates and substitution of an index. The Issuer is required to act in good faith when making these adjustments.

Reinvestment Risk

To invest in a structured product, you need to loan your capital to the Issuer for a set length of time. During this period, a rise or fall in interest rates may present other investment opportunities with a greater yield. You may be able to sell this product back to the Issuer if this situation does occur, however, the price the Issuer offer you may be less than you originally paid.

Inflation Risk

The value of your initial capital and any returns you may receive are not linked to inflation. If inflation is high over the term of the product, your purchasing power may decrease and so the real return could be low or negative.

Taxation Risk

Tax legislation may change during the life of the investment. The tax treatment depends on the individual circumstances of each client and is subject to change. IDAD does not provide tax advice and you should seek independent tax advice if in doubt. It is our current understanding that the returns on this note will be subject to capital gains tax. Further information about tax in the UK is available from the government website: www.gov.uk.

FSCS Protection

This product offers no FSCS protection.

DISCLAIMERS

This factsheet constitutes a financial promotion and has been issued and approved for the purpose of section 21 of the Financial Services and Markets Act 2000 by IDAD Limited which is Authorised and Regulated by the Financial Conduct Authority FCA FRN 740499. All information, including prices, analytical data and opinions contained within this factsheet are believed to be correct, accurate and derived from reliable sources as at the date of the factsheet. The information within this factsheet does not take into account the specific investment objective or financial situation of any person. This material should be read and understood by the investor. If the investor is not a professional client or eligible Counterparty as defined by the FCA or is considered a retail investor, they should seek suitable financial advice before investing, to ascertain the full risks and terms associated with the investment. All investments must be made via an authorised Counterparty. All rights reserved. No part of this publication may be reproduced, copied or distributed without the prior permission in writing of IDAD. Investments may go up or down in value and you may lose some or all of the amount invested. Past performance is not necessarily a guide for the future. Returns from the structured products are at risk in the event of any of the institutions who provide securities for these products default on their financial obligations.

Any financial adviser shall fully disclose to its clients the existence, nature and amount of all fees and commissions it receives in respect of sales of the Note. They must also confirm any such fee or commission complies with all applicable laws and regulations in all relevant jurisdictions and its receipt does not conflict with applicable regulation or any duty to act in the best interest of any person to whom the professional financial adviser owes any such duty.
